Manufacturer:

## Physical & Mechanical Properties

0.37 Field of View (mm):

57.41 Length excluding Threads (mm):

31.5 Maximum Diameter (mm):

165 Weight (g):

## Optical Properties

0.1-1.3 Compatible Cover Glass Thickness (mm):

0.107 Horizontal Field of View, 1/2" Sensor:

0.147 Horizontal Field of View, 2/3" Sensor:

60X Magnification:

0.70 Numerical Aperture NA:

1.8-2.6 Working Distance (mm):

22 Field Number (mm):

60.41 Parfocal Length (mm):

N/A Immersion Liquid:

## Sensor

2/3" Maximum Sensor Format:

## Threading & Mounting

M25 x 0.75 Mounting Threads:

## Regulatory Compliance

## Product Details

- Extra-Long Working Distance (ELWD)
- Broad Spectral Transmittance
- Versatility in Observation Modes

Nikon CFI S Plan Fluor ELWD Objectives are designed with an extra-long working distance to allow for high-resolution imaging of large samples and culture vessels of varying thicknesses. With broad spectral transmittance, from near-ultraviolet to near-infrared wavelengths, these objectives enable versatile imaging across multiple advanced microscopy techniques. These objectives allow for greater flexibility and protect delicate specimens during observations by not requiring immersion media. Nikon CFI S Plan Fluor ELWD Objectives are available in a variety of magnifications and support common observation modes, including brightfield, darkfield, DIC, phase contrast, and polarizing microscopy. These objectives are ideal for general fluorescence, brightfield, calcium imaging, and DIC applications.
