TECHSPEC® Tube System Objective Adapters integrate microscope objectives into C-Mount, T-Mount, or ID1 (SM1) systems. These adapters offer female threads for multiple standard objective thread types, including Olympus (RMS/DIN), Mitutoyo (M26 x0.706), and Nikon (M25 x0.75). A black anodized finish increases these adapters' durability while reducing stray light and reflections within the system. They can be used to construct digital microscope systems by allowing microscope objectives to be integrated into digital camera systems.
