Product Details

- Integrate C and T-Mount Components into Imaging Systems
 - Compatible with M22.5 to M40.5 Machine Vision Threads
 - Step-Up Design Prevents Vignetting
- Machine Vision Adapters for C and T-Mount Components facilitate integration of various components into imaging systems. Polarizers, beamsplitters, or any other C or T-Mount component can be coupled to a standard machine vision thread via these adapters. Additionally, unmounted optical components including filters can be mounted in our [C-Mount or T-Mount Circular Optic Mounts](#) for easy integration. Compatible machine vision threads range from M22.5 to M40.5. The step-up design prevents vignetting.
