General

Type:
Fluorescence Filter Kit

Compatible Fluorophore:
Qdot® 525

Excitation Filter:
#86-349

Emission Filter:
#86-354

Dichroic Filter:
#86-332

Compatible Microscope Brand:
Olympus

Optical Properties

Substrate:
Fused Silica (Corning 7980)

Coating:
Hard Coated

Excitation Wavelength (nm):
415 - 455

Emission Wavelength (nm):
518 - 533

Dichroic Cut-On Wavelength (nm):
510.00

Wavelength Range (nm):
415 - 533

Regulatory Compliance

Certificate of Conformance:

Product Details

- Ensure Proper Alignment of Filter Sets
- Easily Adapt to Common Microscopes
- Available in a Variety of Wavelengths
- Unmounted **TECHSPEC® Fluorescence Filter Kits** Also Available

TECHSPEC® Pre-Mounted Fluorescence Filter Cube Sets are designed to easily integrate into popular Olympus, Nikon, Zeiss, and Zaber microscopes. Each fluorescence filter cube set consists of one **TECHSPEC Fluorescence Dichroic Filter** and two **TECHSPEC Fluorescence Bandpass Filters** that have been specifically oriented to achieve optimum excitation and emission of popular fluorophores. Additionally these filters are also used in polymerase chain reaction (PCR) diagnostic instruments. For increased adaptability, filters can be easily removed and replaced to meet the needs of the application. Unmounted **TECHSPEC Fluorescence Filter Kits** are also available.

Built-to-Order Product: Each product is assembled from stock components at the time of your order. If all components are in-stock, your product will typically ship within 3 - 5 days. If you have any questions about delivery or inventory status, please **contact us**.
