Product Details

- Adapt Light Guides to Optical Components
- C-Mount and T-Mount Versions Available
- Articulating Arm Package Available

These optional Light Guide Mounting Adapters make mounting and integration easy. The versatile mounting adapter is used in some of our [machine vision lens assemblies](#). It connects on one side to fiber optic light guides, using the matching [fiber optic adapter](#), and is secured via a thumb screw. The opposite side features a C-Mount or T-Mount male thread for easy integration with our C-Mount and T-Mount components. Our Articulating Arm Package also provides convenient, adjustable mounting. It includes one 3" long shaft, two knuckle ball-joints with 1/4-20 threaded studs, and a ring clamp.
